

## Cloud Security with Enterprise Mobility + Security (EM+S)

### *Seamless access, uncompromising security.*

Don't worry about the security of your IP in the cloud, we've got it covered.

Microsoft Enterprise Mobility + Security (EM+S) is a powerful suite of security tools that will allow you to securely deliver not just your Microsoft Office mobile apps, but all your cloud-based and cloud-aware applications.

## Main benefits:

- Create a single identity for each of your users that unifies current on-premise workloads and SaaS, to ensure security that is anchored across all platforms
- With a single identity, extend single sign-on to Office 365 and all your apps, boosting efficiency and productivity
- Easily manage privileges and define access conditions based on user, location, application and risk, without hindering your users' ability to make the most out of their mobile devices
- Cloud App Security allows you to identify commonly used apps by your workforce and control or limit their usage as required
- Azure Information Protection allows you to classify your data based on sensitivity
- Sophisticated real-time risk assessment that provides agile security making use of machine learning
- Reduce those helpdesk tickets and increase productivity with self-service capabilities covering: password resets, access request for applications, and creating and managing groups

## Why Cloud Know How?

A flexible working environment should never come at the cost of security and it doesn't have to with Microsoft EM+S, which provides comprehensive security across your on-premise and cloud-based Microsoft applications.

Cloud Know How can not only help you transition to EM+S from stand-alone Microsoft Intune or Azure Rights Management, but also ensure you have all the correct licences in place.
